Pamal Pahasara

Full Stack Developer

+94 71 732 4281 pamalpahasara@gmail.com Pamal Pahasara pamal29

Summary

Full Stack Developer and Computing and Information Systems undergraduate with hands-on experience building responsive web and mobile applications and integrating frontend interfaces with backend APIs and databases. Experienced in React, TypeScript, ASP.NET Core, C, Node.js, FastAPI, PostgreSQL, Entity Framework Core, and REST APIs. Strong foundation in backend development, authentication, database integration, and full-stack application development, with experience contributing to collaborative software projects using Agile practices.

Education

BSc. (Hons) in Computing and Information Systems
Sabaragamuwa University of Sri Lanka

G.C.E Advanced Level Examination - Physical Science Stream
Richmond College

Technical Skills

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, PHP
Frontend: React, TypeScript, React Native, HTML5, CSS3, Tailwind CSS
Backend: ASP.NET Core, Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, Supabase, Entity Framework Core
Authentication: JWT, Role-Based Authorization
DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Linux, CI/CD, Postman, VS Code, JetBrains Rider
AI/ML: Scikit-learn, Supervised Learning, Regression, Classification, Random Forest, Unsupervised Learning, Recommender Systems

Projects

NearU – Hyper-Local Campus Service & Gig Marketplace **Backend** **Web** **Mobile**
Group Project – Team with 4 members
React, TypeScript, React Native, ASP.NET Core, C#, PostgreSQL, Entity Framework Core, JWT, Expo

- Developed the **Food and Transport modules** of a full-stack university marketplace using React, TypeScript, ASP.NET Core, and PostgreSQL.
- Designed and implemented the Testimonials module end-to-end, including the React frontend, ASP.NET Core REST APIs, database integration, and frontend-backend communication.
- Contributed to the Ride module user flow, implementing key interactions between users and transportation services.
- Integrated frontend applications with backend services using REST APIs, Entity Framework Core, PostgreSQL, and JWT-based authentication.
- Served as Scrum Master for one month, facilitating sprint activities, task coordination, progress tracking, and communication within a four-member development team.

PickAFlick – Full-Stack Movie TV Watchlist Application **GitHub Repository**
Individual – In Progress
React (Vite), Tailwind CSS, Node.js, Express.js, Supabase, MongoDB

- Developed a full-stack movie and TV show discovery platform that allows users to explore trending content and manage personalized watchlists.
- Built a responsive React frontend with Vite, Tailwind CSS, React Router, and reusable components for content discovery, authentication, and watchlist management.
- Developed a Node.js and Express.js backend to handle application logic, API communication, and secure client–server data flow.

RepoInsight - GitHub Repository Intelligence Platform **GitHub Repository**
Individual – In Progress
Python, FastAPI, React, Tailwind CSS, OpenAI API, GitHub API, Chart.js

- Developing a platform that analyzes public GitHub repositories to identify programming languages, frameworks, architecture patterns, and project complexity.
- Built a FastAPI backend integrating the GitHub API to process repository data and generate technical summaries.
- Developed a React-based dashboard with Tailwind CSS and Chart.js to visualize language distribution, complexity metrics, and repository insights.

HydroTrack – Water Intake Tracking Mobile Application **GitHub Repository**
Individual – In Progress
React Native, Expo, AsyncStorage

- Developing a mobile water intake tracking application that enables users to monitor daily hydration progress against personalized water intake goals.
- Implemented persistent local data storage using AsyncStorage to maintain daily hydration records and historical intake data.
- Built a responsive mobile interface with React Native and Expo for convenient daily tracking and progress monitoring.

Certifications

Machine Learning Specialization – DeepLearning.AI & Stanford Online, Coursera Jul 2026
Supervised Learning, Advanced Learning Algorithms, Unsupervised Learning, Recommenders & Reinforcement Learning

Microsoft Back-End Developer Professional Certificate – Microsoft, Coursera Aug 2026
C#, .NET, Web APIs, Database Integration, Security & Authentication, Performance Optimization, Deployment & DevOps

Networking Basics – Cisco Networking Academy Sep 2026
Networking fundamentals, network communication, protocols, and basic networking concepts
